

The TAdvStringgrid with the two structures (steps 1 and 2):

Form8

Save ExcellIO Load ExcellIO Save XLSExport Load XLsimport

Stretch

1) Select cell 1,1. Select KEEP RATIO on the top and click the button left. Open STRUCURE.JPG.
2) Select cell 1,3. Select STRETCH on the top and click the button left. Open STRUCURE.JPG.
Select cells 1-3 in row 3 and click on the button tight to the combobox: the image gets stretched
3) Save the grid as a BIN file with SAVE EXCELIO. Then open the file with LOAD EXCELIO
4) Save the grid as a BIN file with SAVE XLSEXPOT. Then open the file with LOAD XLsIMPORT

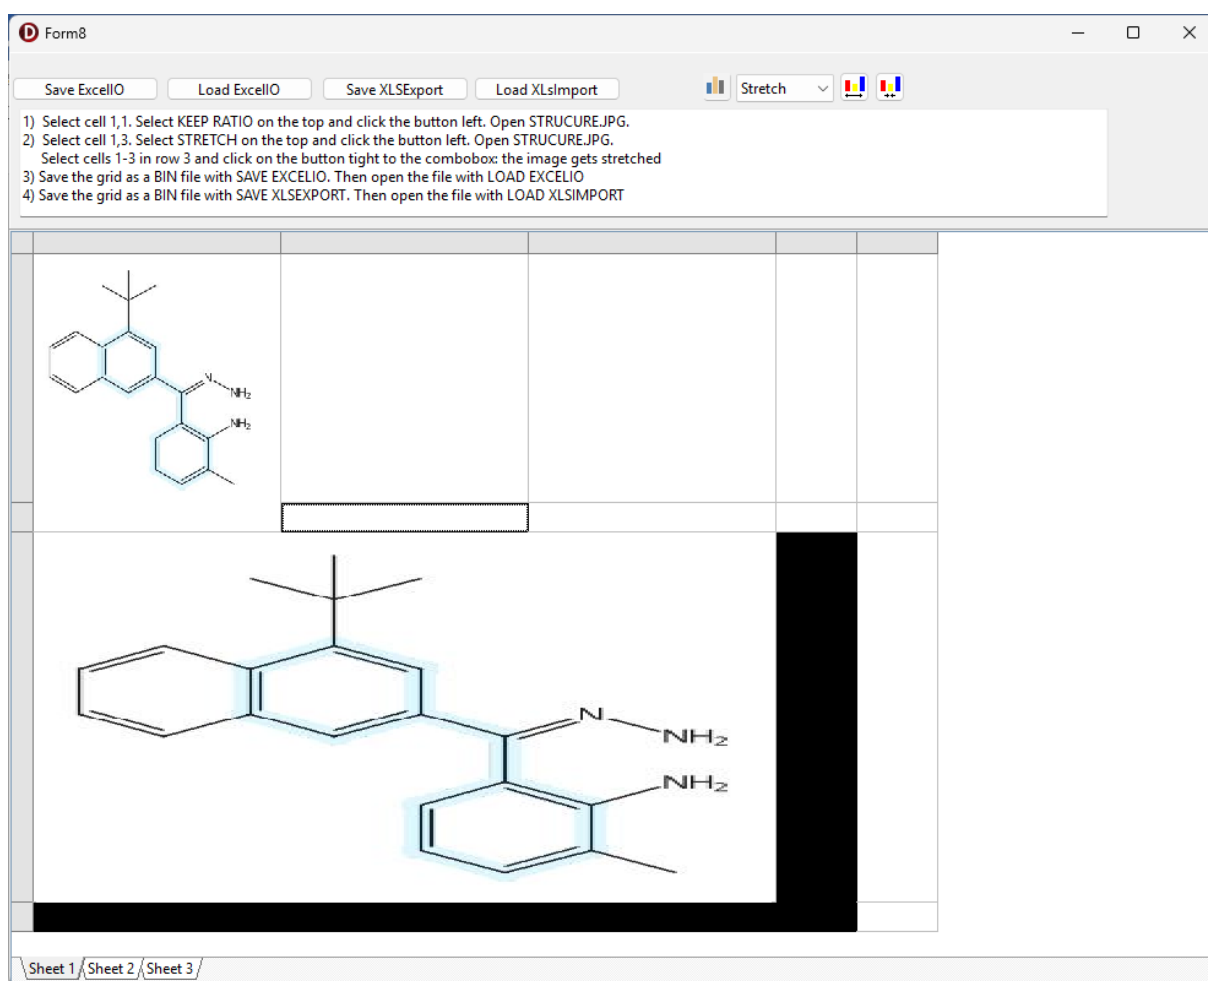

Sheet 1 / Sheet 2 / Sheet 3

After saving and loading (steps 3 OR 4):

Form8

Save ExcellIO Load ExcellIO Save XLSExport Load XLsImport Stretch

1) Select cell 1,1. Select KEEP RATIO on the top and click the button left. Open STRUCURE.JPG.
2) Select cell 1,3. Select STRETCH on the top and click the button left. Open STRUCURE.JPG.
Select cells 1-3 in row 3 and click on the button tight to the combobox: the image gets stretched
3) Save the grid as a BIN file with SAVE EXCELIO. Then open the file with LOAD EXCELIO
4) Save the grid as a BIN file with SAVE XLSEXPOR. Then open the file with LOAD XLSIMPORT

Sheet 1 / Sheet 2 / Sheet 3

The result looks weird. Where is the mistake in my coding and the settings of the components? I need your help!
