

I have 5 buttons in the TTMSFNCToolbarPopup and each of the buttons have height and width set. The Left and Top of each button is set to -1.

The TTMSFNCToolbarPopup AutoAlign is set to True.

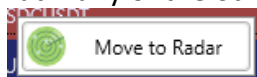

Before calling the Activate function of the ToolbarPopup, the visibility of each of the buttons is set according to their functionality:

```
case TBaseObject(Parent.DataObject).ObjectType of
  otRadar:
  begin
    fncToolBarPopup.Buttons[POP_RADAR].Visible := False;
    fncToolBarPopup.Buttons[POP_FAVOR].Visible := True;
    fncToolBarPopup.Buttons[POP_QTINE].Visible := True;
    fncToolBarPopup.Buttons[POP_BACKT].Visible := True;
    fncToolBarPopup.Buttons[POP_REMOV].Visible := False;
  end;
  otFavourites:
  begin
    fncToolBarPopup.Buttons[POP_RADAR].Visible := False;
    fncToolBarPopup.Buttons[POP_FAVOR].Visible := False;
    fncToolBarPopup.Buttons[POP_QTINE].Visible := False;
    fncToolBarPopup.Buttons[POP_BACKT].Visible := False;
    fncToolBarPopup.Buttons[POP_REMOV].Visible := True;
  end;
  otQuarantine:
  begin
    fncToolBarPopup.Buttons[POP_RADAR].Visible := True;
    fncToolBarPopup.Buttons[POP_FAVOR].Visible := True;
    fncToolBarPopup.Buttons[POP_QTINE].Visible := False;
    fncToolBarPopup.Buttons[POP_BACKT].Visible := True;
    fncToolBarPopup.Buttons[POP_REMOV].Visible := False;
  end;
  otBackTest:
  begin
    fncToolBarPopup.Buttons[POP_RADAR].Visible := True;
    fncToolBarPopup.Buttons[POP_FAVOR].Visible := True;
    fncToolBarPopup.Buttons[POP_QTINE].Visible := True;
    fncToolBarPopup.Buttons[POP_BACKT].Visible := False;
    fncToolBarPopup.Buttons[POP_REMOV].Visible := False;
  end;
end;
```

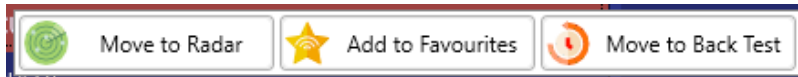

The result is, that if the Popup is first activated on the object type Favourites item where only one button is visible the result is correct:

But if any of the other object types are selected again only a single button is shown:

If I restart my application and first select an object type associated with multiple buttons, the result is correct:

If I then select the object type Favourites where only one button is supposed to be visible I get the following result:

How do I fix this behaviour that all visible buttons are displayed and the toolbar is resized correctly?
